## CDS-John Blue Centrifugal Pumps Are Designed To Outlast Your Equipment

*Yes, initial cost may be more, but it keeps working for less!*

For over 100 years, CDS-John Blue Company has been committed to creating pumps that deliver uncommon performance, quality and value. Our commitment to serving the needs of the American Farmer translates to a continual search for new technologies, materials and engineering techniques that lead to breakthroughs in pump performance and handling. By continuing to make our pumps perform even better than the last, **let us show you the CDS-John Blue Centrifugal Pumps that can be run dry without damaging the seal - at a price you can afford.**

**SP 3320-G13H**

### Features:

- Patented Vac-U-Seal impeller design creates a vacuum between the impeller and mechanical seal. Lack of pressure on the seal face minimizes seal wear and results in a longer seal life.
- Double wet seal design provides for continuous lubrication of the seal faces. This wet seal design allows the pump to be run dry for extended periods with no damage to the mechanical seal faces.
- Closed impeller design minimizes thrust loading on the drive motor extending the life of the drive motor. Impeller wear actually increases performance - CDS-John Blue Centrifugal Pumps get better with use!
- Extra thick cast walls provide extra strength and extend the life of the unit due to abrasion and corrosion.

**2 Year Unconditional Warranty on Pumps
