## NEW for 2017

### PISTON PUMP PULSATION DAMPENER

Are you in a low flow application that requires a very slow pump rpm and are concerned about the smoothness of your fertilizer delivery?

The greatest discounts of the year come during the **preseason order** season. This program begins Sept. 1 and continues through Oct. 31, 2017 with delivery taken by Feb. 1, 2018.

The **New** CDS-John Blue pressure dampener part# **116344-91** is now available for piston pump applications. It allows the piston pump to be turned slower for lower application rates while still delivering fertilizer smoothly across your field. It can be conveniently threaded directly into the outlet port of your piston pump or plumbed remotely into your discharge line. It's simple yet effective design forms an air cushion in the 1-1/2 inch pipe body making the flow extremely smooth. It is constructed of robust schedule 80 PVC pipe to resist harsh environments. It is painted to give protection from the affect of the sun's UV rays. It is designed to last for years to come. Order yours today.

Summer is the most cost effective and time efficient period for **pump maintenance and repair** to ensure that your pump is in top shape for the upcoming season.

Continued from front

## CDS-JOHN BLUE CORNER

**Product Update:** Effective immediately, gray balls will now be included with the Liquid Blockage Monitor System. They will complement the orange, yellow and green balls already included in the standard, premium and ISOBUS kits. To order gray balls separately the part number is: SMPT-0085.

The SMPT-OSA4 orifice selectors will now be shipped with a total of four plates with four different orifice openings on each plate giving a total of sixteen different possible orifice selections located on the top of the VisaGage ball monitors.

Please note that PP-280 pressure spray pump has been discontinued.

The world is changing, the way we view information is easier and more accessible than it has ever been. At one point in time the only source of media was the newspaper and radio, followed by TV and now the internet. We have cell phones and tablets that fit in our pockets and give us access to all of these. Now we have a new platform for information in social media.

CDS-John Blue Company has recently decided to up our social media game. We are now active in both Facebook and Twitter @cdsjohnblue. Through these two platforms you are able to see information like new product releases, company news and happenings, as well as helpful information on all of our existing products.

These platforms also open new doors for our existing and potential customers to communicate with us directly. We have experienced troubleshooting team members ready and available to answer and reply to any question or comment you might have. We hope by opening these new media platforms our customers will have even more up to date information and news about CDS- John Blue Company. By doing this we can promote new and innovative products to the end user so we can work together to feed the world!

Be sure to take full advantage of this opportunity by following us on Facebook and Twitter @cdsjohnblue.
