MIKE POLAND WILL RETIRE IN JUNE 2019:

We're celebrating Mike and his commitment to John Blue Co.

After 25+ years of employment with CDS-John Blue Company, Mike Poland will be retiring in June 2019. Mike grew up as part of the John Blue family—his father worked for John Blue for 32 years and Mike spent high school summer breaks also working for John Blue. Mike was hired on full-time as the Manufacturing Manager in March 1993, was promoted to leadership roles in the 1990's, and became Chief Operating Officer in 2002.

*"I will miss the wonderful people at JBC in Huntsville, but also the owners and our customers that have always been wonderful to work with. John Blue has always been a family-oriented business. I have at least one good but many funny memories about every coworker here and I will take that home with me forever in retirement. **I will always bleed blue.**" - Mike*

Mike has always been an integral part of the John Blue family. His presence around the office and in our lives will be missed but his dedication to John Blue has made a lasting impact, and one that has made the company better in so many ways. Over the next couple of months, please join us in thanking Mike for his years of loyalty and hard work, and wishing him well in retired life.

NOW AVAILABLE:

New electric motor models round out the Poly-Centrifugal pump series.

Our 2" Poly-Centrifugal Pump series is now available with single-phase and 3-phase electric motors in both TEFC and Drip-Proof configurations. These durable and versatile pumps come fully-assembled from the factory and feature our double wet seal assembly—the seals won't fail if the pump is run dry!

SPECIFICATIONS:

Max Capacity:	200 GPM
Capacity @ 25 PSI:	112 GPM
Max Pressure:	45 PSI

WE HAVE DEPENDABLE DUAL RATE PUMPS FOR METERING 2 LIQUIDS AT ONCE!

CDS-John Blue Company has several next-generation double piston, double acting pump models that allow the application of two products, at two different rates, from a single unit with one drive system—perfect for having starter fertilizer on one side and nitrogen on the other. With an independently adjustable stroke, and max pressure of 120 PSI, these dual rate pumps offer incredible flexibility and efficiency in a single pump.

NGP-5655-AR: 10:1 max ratio, 450 RPM max speed, 31.2 GPM max flow (10.2 GPM small side, 21 GPM large side)

NGP-8055-AR: 5:1 max ratio, 450 RPM max speed, 42 GPM max flow (21 GPM per side), 1½" FPT inlet/outlet

◀ NGP-9055-AR: 5:1 max ratio, 450 RPM max speed, 68.4 GPM max flow (34.2 per side), 1½" FPT inlet/outlet

CDS-JOHN BLUE COMPANY WELCOMES MARC PUGH

We are excited to have Marc join our engineering team!

Marc Pugh joins CDS-John Blue Company as a Design Engineer with 6 years of engineering experience in manufacturing, quality, and design environments. Within this role, Marc will help implement performance and improvement concepts in the design of new products for advanced agricultural technology.

"I am excited to have this opportunity to join a company that has maintained a great reputation for dependability and quality within the agriculture industry for many years. I hope that I will be able

to contribute to this success and also build upon it in the coming future. My new coworkers have been extremely helpful with all aspects of my start with CDS-John Blue Company."

Marc is a 2014 Mississippi State University Graduate with a Bachelor's Degree in Mechanical Engineering and a minor in Mathematics. In his spare time, Marc enjoys spending time with his family, mountain biking, road cycling, watersports, and many other outdoor activities. He is a Birmingham-native and lives with his wife Anna, and 11-month-old son Flinn.

UPDATED MANUALS & MATERIALS

Occasionally we update our product manuals and materials. When referencing a CDS-John Blue Company manual, please visit our online resource library, search by document name or number, and download the most current version.
